Emergency Communications Frequency Usage at VHF/UHF

Introduction

The Emergency CoA is not part of VHF/UHF band planning for good reasons as the requirements vary significantly from country to country.

This information paper lists frequencies which emergency communications groups have provided to me and which they have not blocked for publication on websites.

By being informed of current usage, it is hoped that this will assist Committee C5 should any band plan changes be proposed for other reasons (e.g. Space / Satellite) which may affect existing emergency communications uses.
